PROJECTS

Bengaluru Home Price Predictor

Python, Flask, Scikit-learn, HTML/CSS, JavaScript

- Built a full-stack ML web application to predict property prices based on location, square footage, BHK, and bathrooms.
- Trained a Linear Regression model on real-world Bengaluru real estate data; applied one-hot encoding for 240+ location features.
- Developed RESTful APIs using Flask; connected to a responsive frontend using HTML, CSS, and vanilla JavaScript.
- Enabled real-time predictions via user-friendly dropdowns and input forms; deployed locally with future deployment plan to cloud.
